

PRODUCT LIST

Fabric

1. Woven-Cotton, Polyester, Polypropylene, Nylon, Ryton, Glass etc.
2. Nonwoven Polyester, Polypropylene, Nomex, Ryton etc.

Made Ups

1. Filter Press Butterfly
2. Centrifuge Bags
3. Fluid Bed Drier
4. Candle Filter Bags
5. Neutche Filter Bags
6. Anode Bags
7. RVD & ANFD Filter Fabric Applications
8. Dust Collector Bags
9. Leaf Filter Bags etc.

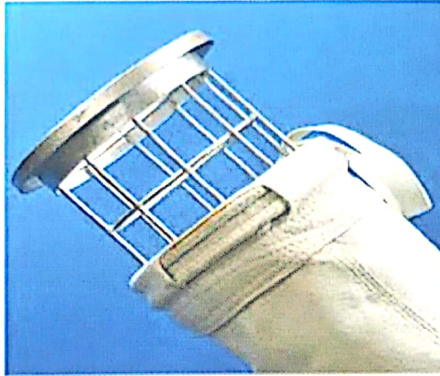

Fabrication & Valves

1. Cages for DC Systems
2. Cages for Flash Driers
3. Valves

Cellulosic Filter Pads

DUST COLLECTOR SYSTEMS (BAGS & CAGES)

We manufacture all dust collection systems & consumable Dust collector bags to fit your operational requirement.

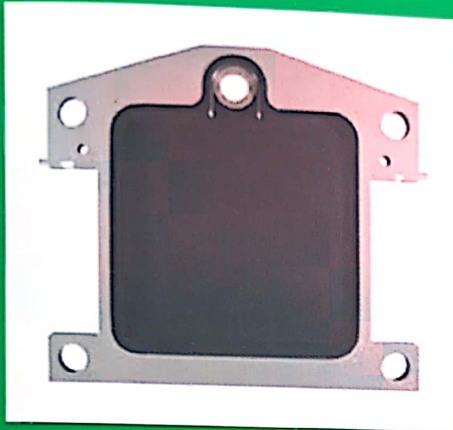

VALVES

Electronic Liquid valves used to modulate & control the flow of liquid with greater accuracy. We provide high quality components which work with precision.

FILTER PRESS

It is a separation process, specially employed by solid/liquid separation components of filter press are frame and filter fabrics which ensure cost effective filtration & highly efficient too.

The Filter Presses are used widely across the industries in number of applications such as

1. Ceramic Industry- For the clay dough preparation
2. Edible Oil Industry- Palm Oil Fractionation
3. Edible Oil Industry- Oil Separation from crushed seeds (Mustard & Rice bran)
4. Effluent Treatment Plant- Solid waste separation from slurry
5. Recovery Plants- Paint Shops of Automobile Industry
6. Chemical Plants- Silica Preparation, Zinc Sulphate based fertilisers etc.

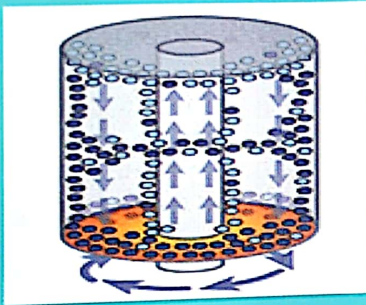

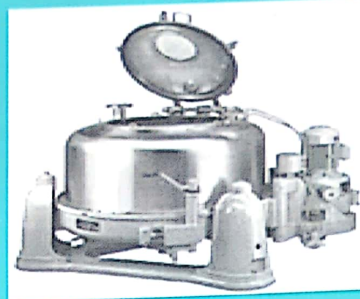

We make compatible filter press cloth to different designs of presses e.g.

1. CGR Plates
2. Membrane Filter Presses
3. Plate & Frame Design
4. Zero Barrel Leakage/ Rubberised Barrels
5. Casketed Zero plate Leakage etc.

CENTRIFUGES

CF operations are huge technological challenge. The centrifuges must spin very quickly -- in the range of thousands rpm. To spin this fast, the centrifuges must have:

- Very light, yet strong, rotors
- Well-balanced rotors
- High-speed bearings, usually magnetic to reduce friction
- Effective filter media to separate material with different specific gravity

We advice filter media sort & quality only after thorough investigation of processes and solvents involved. We can manufacture Centrifuge bags for different types of Centrifuges e.g.

1. Peeler Centrifuge
2. Top Bag Lifting Centrifuge
3. Bottom Discharge Centrifuge etc.

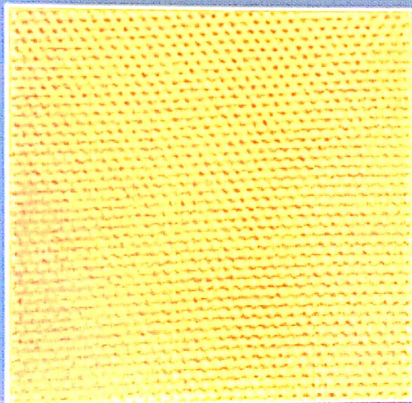

FLUID BED DRYERS

This processing involves drying, cooling, agglomeration, granulation, and coating of particulate materials. It is ideal for a wide range of both heat sensitive & non heat sensitive products. We can supply safe antistatic carbon filament fluid bed dryer bags.

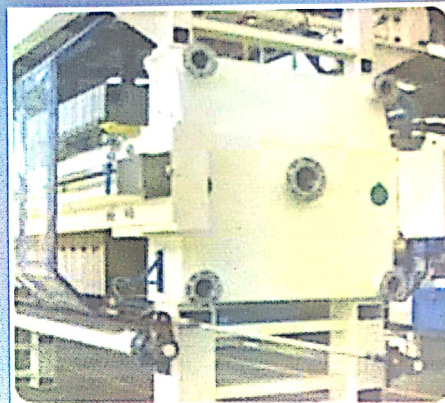

OUR SPECIALITY PRODUCTS

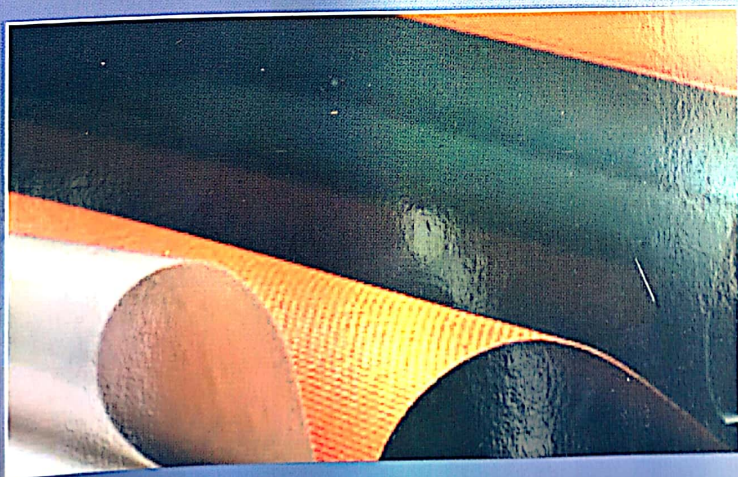

Liner Fabrics for Tyre Industry

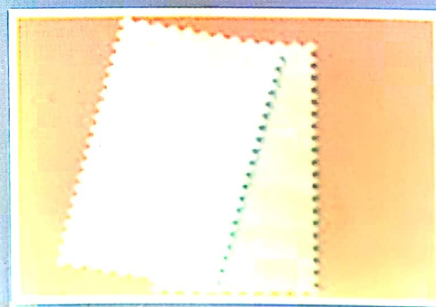

Palm Oil Fractionation Fabric

Impression Cloth

Antistatic Filter Fabric

Nylon Filter Press Cloth capable to sustain high pressure screw pumps
Precision Filter press cloth on CGR plates for Breweries
